Churn Reasons

The Way Forward

- Given that consumers have churned due to increased rates and additional data fees, it is advisable to raise the amount of data offered and to match pricing while also enhancing internet speed. This is because competitors are likely offering better and lower prices based on the reasons customers left.
- Customers have left as a result of staff poor treatment, thus staff need to be trained in providing excellent customer service.
- With the aim of improving services and products, offer B's promotion should be repeated since it has historically been a successful venture. Offer B has attracted the most clients.
- There is room for improvement in areas like customer services offered, network dependability, and online self-service.
